

The EMBA 45 story

The Graduates of the EMBA 45 class did not want to cease their learning experience once they had their diplomas in their hands. Based on their great experience to go through the EMBA class together they decided to found a «club». All of its members committed to 3 years of continuous learning and to attending an additional 3-day program once a year put together specifically by the Custom Team of the Executive School. They called it the «General Management Refresher Program». The 3 days were used either to deepen topics from the EMBA class and/or to broaden them by introducing newly researched topics from the Institutes. Being a huge success the «club» has decided to commit to another 3 years of continuous education at their «Alma Mater».
